➢ Homework #1

1. Make your own Hello World application and run your application on AVD.
- Create a new Empty View Project
- Remove the use of edgeToedge() and *ViewCompat.setOnApplyWindowInsetsListener()*
- In the middle of your application, your own customized text should appear.
- Try to add one more TextView (For layout, try to search for setting vertical/horizontal constraints of a view).
- Setting Text styles (bold, size, color, etc.) is optional
- Refer to the example below.
